Husqvarna Group's customer information on REACH

Dear Sir/Madam

Background

REACH (Registration, Evaluation and Authorization of Chemicals) entered into force on June 1, 2007. This letter presents Husqvarna Group's current position regarding the EU REACH regulation and addresses our obligations and our commitment to meet the legal obligations under REACH. This letter is also applicable for the UK REACH Regulation.

Substances of Very High Concern (SVHC)

Certain substances have been selected, listed and issued in the candidate list by the European Chemicals Agency (ECHA) as Substances of Very High Concern (SVHC). The REACH regulation thereby encourages manufacturers to substitute these chemicals, when suitable alternatives have been identified.

According to our knowledge, the following chemical substance(s) on the current candidate list (SVHC) has been identified in the delivered product, above the declarable weight limit.

Part(s)	Substance name	Substance CAS
579819301 BELT X10-profile Ld=860	6,6'-di-tert-butyl-2,2'-methylenedi-p-cresol	119-47-1

The Husqvarna Group maintains constant and on-going checks, in close cooperation with our suppliers, on the content in products and other articles to be able to give the latest information.

Changes in the candidate list or in the product specification can lead to reevaluation of this statement. We will use our best efforts to provide updated and relevant information required for compliance with the EU REACH regulation and UK REACH regulation. If you have further questions, please do not hesitate to contact the undersigned person.

Best Regards

Husqvarna Brand Division

Claes Losdal
